- WebDiary Academy's ReactJS Course

Professional Experience

Associate Software Engineer

September 2023- Present (8 months)

Associate Software Engineer trainee

March 2023 - September 2023 (5 months)

Global Infonet Inc, Kochi

Global Infonet Inc is a SharePoint Consulting Group focusing on Sharepoint. Their main product is Dock365, a contract management system, built on SharePoint and React.

Key responsibilities:

- Initiated and successfully completed the development of the transformative Quick Link feature in Dock 365's Contract Management System (CMS) 4.7 release. This innovative addition, comprised of 28 strategically integrated panels throughout the system, empowers users to effortlessly access and edit related entity details directly from an entity, eliminating the need for redirection. This enhancement significantly amplifies user efficiency and elevates the overall user experience.
- implemented various features and resolved critical bug fixes, leading to a substantial enhancement in the performance and functionality of Dock 365's Contract Management System (CMS).
- Collaborated with teams to deliver high-quality solutions.
- Actively participated in team meetings and code reviews.
- Worked in feature enhancements by implementing more user-friendly design and workflows.
- Worked in UI overhaul.
- Performed comprehensive unit testing and diligently conducted code reviews, upholding rigorous coding standards and ensuring impeccable code quality
- Active participation in feature analysis and suggestions.

Personal Projects

HR-PORTAL App

- HR portal app streamlines employee management with features for adding and updating employee information, uploading files and images, and managing descriptive notes for each employee. It ensures data accuracy, security, and a user-friendly experience for HR personnel
- Built HR portal's front-end using React.js with Material UI for modern design and SASS for organized styling, delivering a responsive user interface across devices.
- Express.js used for server-side, SharePoint as database. Secure APIs for HR functionalities, data integrity, and user privacy ensured.
[GitHub Repository](#)

Flim-flix App

- Flim-flix is a responsive web application that provides comprehensive details about various films, powered by React, Sass, Material-UI, and the TMDB API.
