Global Infonet Inc, Kochi
Global Infonet Inc is a SharePoint Consulting Group focusing on Sharepoint. Their main product is Dock365, a contract management system, built on SharePoint and React.

Key responsibilities:

- Initiated and successfully completed the development of the transformative Quick Link feature in Dock 365's Contract Management System (CMS) 4.7 release. This innovative addition, comprised of 28 strategically integrated panels throughout the system, empowers users to effortlessly access and edit related entity details directly from an entity, eliminating the need for redirection. This enhancement significantly amplifies user efficiency and elevates the overall user experience.
- implemented various features and resolved critical bug fixes, leading to a substantial enhancement in the performance and functionality of Dock 365's Contract Management System (CMS).
- Collaborated with teams to deliver high-quality solutions.
- Actively participated in team meetings and code reviews.
- Worked in feature enhancements by implementing more user-friendly design and workflows.
- Worked in UI overhaul.
- Tested and reviewed code to meet standards and improve quality.
- Active participation in feature analysis and suggestions.
